SKINPEN PRECISION BUZZ

SkinPen Precision is widely praised in the media and recognized as a top-tier treatment within the aesthetics industry.

BRING THEIR INNER BEAUTY TO THE SURFACE WITH SKINPEN® PRECISION

Give your patients the power of their own natural collagen for youthful rejuvenation

SkinPen® Precision is a microneedling device that triggers the natural wound-healing process of your skin to treat acne scars and help to improve the appearance of fine lines & wrinkles, surgical scars, stretch marks and enlarged pores. SkinPen Precision is also found helpful in improving the cosmetic appearance of pigmentation conditions (Dyschromia) by returning the skin to a more normal pigmentation activity.

6 INDICATIONS:

- Acne Scars
- Fine Lines & Wrinkles
- Surgical Scars
- Stretch Marks
- Enlarged Pores
- Pigmentation Conditions (Dyschromia)

5 TREATMENT AREAS

- Face
- Neck
- Decolletage
- Hands
- Body

SkinPen® Precision Intended Use - FDA-Clearance:

In the US, SkinPen® Precision system is a microneedling device and accessories intended to be used as a treatment to improve the appearance of wrinkles of the neck for Fitzpatrick skin types II - IV and to improve the appearance of facial acne scars in adults with all Fitzpatrick skin types aged 22 years and older.

Indications and body treatment areas for SkinPen® Precision may vary based on your country. For more information, please visit skinpen.com/international

BEAUTIFULLY ENGINEERED AND ASSEMBLED IN THE U.S.

SkinPen® Precision has unsurpassed technology and validation*

THE FIRST US FDA-CLEARED DEVICE AND PROCEDURE.

Superior features: Efficacy and safety proven over many years by multiple peer-reviewed publications and 90 validation studies.*

Patented Intuitive Speed Control Technology for the optimal treatment of varying skin thickness

- Validated to maintain 7,000 RPM (+/- 70 RPM) despite skin thickness.
- Hassle-free with no manual speed adjustments required.

The only cordless device powered by inductive charging

- Offers the versatility and safety of a cordless device without the worry of cords entering the treatment field and posing a risk of cross-contamination.
- Runs at optimal power regardless of the level of battery charge remaining.
- Guarantees your device is charged continuously with the power you need.

LED smart technology for optimal performance

- Software driven technology communicates battery life, as well as provides troubleshooting mechanism.

The only ultrasonically sealed hand piece available on the market

- Combined with a custom Bio-Sheath for hand piece, validated to prevent fluid ingress through the sheath seam or the cartridge-device interface.

The highest quality lithium battery

- We stand by our device with reliable, consistent and superior technology.
- Medical grade motor performs continuously for 6-7 hours with a fully charged battery.

World-class ergonomic design

- Tested by physicians and designed for optimal user comfort.
- Perfectly balanced to avoid user fatigue.
- The lightest device available on the market 141.7g (≤ 5 oz).**
- No cumbersome button controls to adjust speed. The intuitive speed control technology does it for you optimally.

FDA-CLEARED, CE MARKED CLASS IIA, ARTG (AUSTRALIAN REGISTER OF THERAPEUTICS GOODS), MEDSAFE (NEW ZEALAND) AND HEALTH CANADA, ISO CERTIFIED

* Data on file. For complete FDA clinical trial summary and information on how to use the SkinPen Precision microneedling device, visit skinpen.com/International.

** Amongst FDA-cleared and CE mark Class IIa cordless devices.

THE UNRIValed TECHNOLOGY YOU AND YOUR PATIENTS CAN TRUST

FDA-Cleared Advanced Cartridge Unit and U.S. engineered*

Minimize back flow and risk of cross-contamination

- Validated single-use-lock-out feature: Designed so that only one patient can be treated with each sterile Advanced Cartridge Unit for one-time-use and safety.

Validated to penetrate to the depth selected

- Ensures precise and reliable depth penetration up to 2.5 mm.
- Validated for the device to perform at the specified depth deemed safe for patients.

Complete insertion and retraction of needles

- Reciprocating mechanism is housed in the disposable needle cartridge for precise calibration.
- Unlike unreliable spring reciprocating mechanisms used in other devices, SkinPen Precision's coupled reciprocating mechanism allows for complete and consistent insertion and retraction of the needles on every rotation.

Needles validated to stay sharp at least 80 minutes in use

- Fourteen stainless steel surgical-grade needles validated for sharpness, durability and penetration depth.
- Needles perform consistently regardless of the skin thickness or texture while delivering 1,600 micro-channels per second.

* Data on file. For complete FDA clinical trial summary and information on how to use the SkinPen Precision microneedling device, visit skinpen.com/international.

DISCOVER THE UNIQUENESS AND HIGH VALUE OF SKINPEN® PRECISION'S ALL-IN-ONE TREATMENT KIT.

All-in-one safety and convenience treatment kit

1

Advanced Cartridge Unit (ACU)

EO (Ethylene Oxide) Sterilized, disposable medical microneedling cartridge. Patented, FDA-cleared, and validated for high performance and safety. One-time use per patient.

2

Lift HG glide gel, (15 mL)

The only FDA-cleared glide gel clinically proven safe for microneedling procedures. It is a lightweight, water based topical applied to the skin just prior to the treatment and serves as a mechanical barrier reducing friction at the surface of the skin and improving patient comfort. LIFT HG does not contain drugs or biologics and is non-cytotoxic.

3

Rescue Calming Complex, (10 mL)

Cosmetic calming complex to be applied liberally AM/PM, as needed to soothe and calm skin. It contains magnesium, zinc, and copper, while ethyl macadamiate and sodium hyaluronate. Suggested to be used 24 hours post treatment.

4

Custom fit disposable Bio-Sheath

Durable, single-use sheath designed to minimize the potential of cross-contamination between patients.
